

New Family Orientation

School Year: 2016-2017

Student Name: _____

New Family Orientations are required for all new students to Cyber Village Academy. These orientations provide background information about Cyber Village Academy, details about the school program, and copies of the CVA student handbook. The Fusion Program orientation includes providing students with their Moodle online classroom platform log-in information and a detailed walk-through of the Moodle system. The PASCAL Program orientation includes an overview of the student responsibilities and a walk-through of the Edmentum system. High school students will also have time to meet with the program coordinator and select courses.

Please review the dates and times that orientations are available and select a date and time that works for your family. A parent/guardian should plan to attend the orientation along with the student. **You will only need to attend one orientation session.**
