

Internet

Per my RFP in Form 470, I requested minimum 250Mbps up and down since this is our current connection speed and what we would start off with our new contract. If someone providing a quote that didn't include a 250Mbps options, I took the closest option, broke the cost down per Mbps and multiplied by 250.

		Cost Per Month	Best Price Gets 1 point	Cost of Install	Best Price Gets 1 point	Total Points Contract awarded to highest points
250Mbps	Comcast (200Mbps quoted at 575.05)	\$718.81	0	\$2,654.31	0	0
250Mbps	Cytranet	\$1,515.00	0	\$550.00	0	0
250Mbps	Zayo (Cost was for 100MB up to 1G)	\$2,418.00	0	\$0.00	1	1
250Mbps	Arvig	\$600.00	1	\$0.00	1	2

Based solely on cost to start 250Mbps up and down service July 1st, the contract is awarded to Arvig
